# EDUCATION / EDUCACIÓN

- Flisol (Latin American Festival of Free Software Instalation)
- International Open Access Week 2022
- La Mocha Celis (Travesti-Trans People's school)
- Transistemas
- Schools
- Hack Labs (R-Lab, Hack Fun Rosario)

**We believe that it is necessary for computing to have a place in the school curriculum. This must be accompanied by teacher training in this science. Knowledge about computing, from a critical perspective, should be a right for everyone. It is one of the pillars to discuss in depth urgent issues such as the right to repair, the safeguarding of our data or the emissions of polluting gases generated by the consumption and constant manufacture of computers.**

# ¡ GRACIAS !
